Home Health

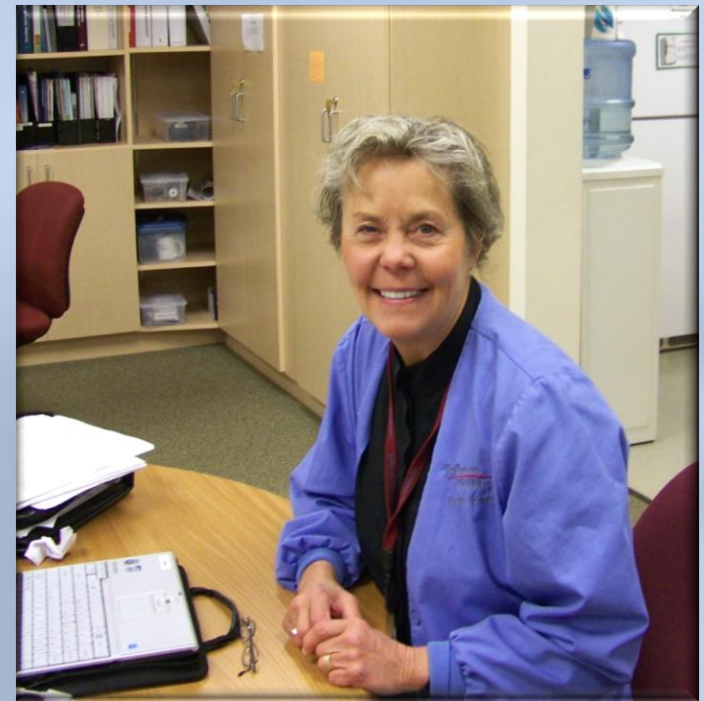

Bringing care to you

- The goal of Home Health services is to assist people in their homes to become as self sufficient and as independent as possible
- Home Health is paid for by the Medicare/Medicaid benefit and most insurances

The Home Health Clinical Team

- Nursing
- Physical, occupational and speech therapy
- Medical Social Work
- Certified Nursing Assistants

The Home Health team helps ...

- In adjusting to new self care regimes
 - Assessing response to medical treatments
 - Medication Management
 - Wound and ostomy care
 - Lab draws and IV Therapy
- In recovery from surgery, accidents and stroke
- In short and long term planning and referral to community resources

What do we offer the caregiver?

- Healthcare expertise adapted to the home
- Education specific to your situation
- 24 hour on call nursing support
- Care coordination with your doctors

After Home Health

- Most patients are able to return to normal activities
- We work as partners in care with other health care providers
- As the situation changes we are able to offer services again
